## The BenQ 27" Full HD LCD Monitor Connect to Fun

BenQ M2700HD LCD Monitor

**BenQ**  
Enjoyment Matters

## ❖ All Eyes on This

BenQ's first-ever 27" LCD monitor, the M2700HD features a magnificent 16:9 Full HD screen enhanced with Senseye® Human Technology. Designed not only for the best viewing, but also for a superior listening experience, the M2700HD is perfect as the hub for your digital home, with a full array of ports for connecting home electronics and computing devices that output video. For easy access to all controls from wherever you like to enjoy the wealth of entertainment options that can be displayed on the M2700HD, there's a remote control. With all this going for it, it's no wonder that all eyes in your home will be on the M2700HD.

## ❖ Delightful by Design

Despite its expansively proportioned screen, the M2700HD looks sleek and streamlined due to a sophisticated industrial design. High-gloss surfaces, silver mesh grilles, and transparent materials are judiciously used to reduce apparent bulk and create interesting visual counterpoints, while the built-in suspended speakers appear to float mid-air. The gorgeous appearance even extends to the back, with its smoothly contoured black mirrored shell and stylish metal.

## ❖ Get the big picture

The generous dimensions of the M2700HD's expansive 27" screen is a huge boon whatever you happen to be doing. With room for working with multiple windows in view, you'll see an immediate productivity boost. The ergonomic benefit of all that screen real estate is clear as well, preventing eye strain from peering at tiny text and screen elements for long periods. The big-screen view for games and all types of video simply take these activities to a higher level of fun. All that space for content also makes multitasking, or mixing work and play, not simply practical but a pleasure.

## ❖ Make the Right Connections

Whatever content you want to view, the M2700HD has got you covered. There's an amazing 13 ports covering all the popular interfaces. Whether you want to hook up HDMI-equipped digital devices, analog video equipment like TVs, digital video sources like DVD players, game consoles, or virtually any device with viewable content, the M2700HD is the display that can do it all.

## ❖ Listen in Luxury

The M2700HD is not only about great viewing. It's also about great listening. Embracing Sound is a new technology that takes advantage of spatial information embedded in movies and high-definition audio files to create greater presence and realism. Five preset modes provide tailored for specific types of audio. You'll swear you're hearing it all live.

## ❖ Enjoy the Best View

The M2700HD's big beautiful screen brings together Full HD 1080p resolution with a widescreen 16:9 aspect ratio, phenomenal 50000:1 dynamic contrast ratio complemented by 400 nits of brightness, and Senseye® Human Vision Technology. Add in Advanced Motion Accelerator technology for superior gray-to-gray response times, and six convenient preset viewing modes with Senseye® 3, and what you have is a no-compromise display that makes it easy to enjoy the full visual splendor of high-definition content, including fast-action video, with stunningly crisp detail and ultra-fluid movement—with optimized settings for whatever content you're viewing.

## ❖ Watch from Anywhere

The spacious screen on the M2700HD means you don't need to sit close by for a great view of movies, photos, and other content. Thanks to the remote control, you can enjoy it all from the comfort of your sofa or bed, easily controlling picture and sound right from where you happen to be.
