

S400

Windows®. Life without Walls™. Getac recommends Windows 7.

SEMI RUGGED 14" LAPTOP

- 14 inch HD widescreen display
- Optional 800 NITs sunlight readable multi-touch display
- MIL-STD 810G for shock, vibration & temperature
- Water-resistant mechanical keyboard
- Certified to withstand a 36 inch drop
- Customizable quick keys
- Certified for -4°F low temperature option

Faster Processors.

With the latest dual-core Intel Core i3 or Intel Core i5 processor, the S400 semi-rugged laptop performs up to 91% faster than the previous generation.¹ Clocking in at up to 2.6 GHz and with Turbo Boost speeds up to 3.3 GHz.

Kryptoshell™

The S400 is built using our new KryptoShell™ body material. This new KryptoShell body allows the S400 to meet or exceed MIL-STD 810G temperature, shock, and vibration specifications including a 3 foot drop on six faces. Every port door and hinge was engineered to withstand a twist strength of up to 30 kilograms of force per centimeter.

Low Temperature.

Being able to work in any environment is critical, even freezing cold conditions. By insulating the storage drive inside a heating blanket, we are able to boot the computer without risk to the drive or it's data in environments as cold as -4°F.

Sunlight Readable Display.

The S400 semi-rugged laptop offers an advanced 800 NITs QuadraClear™ display. Our QuadraClear solution combines proprietary technologies for both screen brightness and antireflectivity to reduce the sunlight's reflectivity and providing an effective contrast ratio seven times better than other displays.

Discrete Graphics.

The S400 semi-rugged laptop features a 14" widescreen display. Configure your S400 with the nVIDIA GeForce GT 730M discrete graphics featuring 1GB of dedicated memory and get faster speeds (frames per second) with incredible responsiveness.

Ultrafast 4G LTE.

With both 4G LTE and WiFi access available, you can be connected 24/7 wherever you are, allowing you to improve productivity. Designed for next generation wireless technology, you can connect wirelessly for mission critical information at amazing speeds.
